Support the fight against COVID-19

TrafficBox allows monitoring of gatherings of people within its operating range

Thanks to our device, we help maintain security and appropriate space by controlling the number of people

Security services and medicine employees receive support by monitoring the area in real time

Data matters here

- We rely on real data obtained through a real network of mobile phone users

- We process and analyze data obtained from a proven source and related to the desired area

- We support Populations Control in public places, allowing for secure crowd management

Our possibilities

- Real-time population measurement

- Data acquisition with an accuracy of 1m

- Statistics and people flow analysis in specfific areas

One device
many options

- Events, promotional campaigns, demonstrations, debates

- Government organizations and public administration

- Hospitals, quarantined areas

- Shopping malls, clubs and restaurants

- Green space, boulevards and city parks

- Office buildings, factories and storage halls

Check queues in store
without leaving your house by using small box

Check how many people are currently shopping at your favorite location

Check if it's safe to take a walk with your kid to neighboring park

Remain in a safe distance and avoid crowded places

- User-friendly map
- All data in one place
